Sole Importers of

racing lubricants off road and two wheel
Everything runs better with Bardahl

BARD AHL exclusive **POLAR PLUS - FULLERENE**

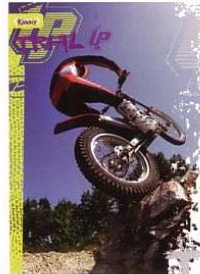

FORMULA offers a triple-layer protection:

a lubrication film on the surface, a layer of **POLAR MOLECULES** and additional **FULLERENE C60** molecules as a final protection mechanism.

- The **POLAR PLUS** molecular lubricating film adheres permanently on the engine metal parts by creating a permanent security barrier.
- The **FULLERENE C60** molecules act like microballs between metal surfaces and therefore reduce wear, preserving the engine and transmission.

The **POLAR PLUS** and **FULLERENE C60** formula ensures a level of performance far superior to conventional lubricants.
